Seven Dials Mystery

Prize: A Colin Dexter Morse book signed by 'Inspector Morse'. Closes 01.12.2013

Solutions run in three directions. Circular solutions run in a clockwise direction on the outside of dials. Diametric solutions run from a point on the outside of a dial, through the centre, to the other side of the dial. Down solutions run from the top dial down through corresponding cells of dials to the bottom dial.

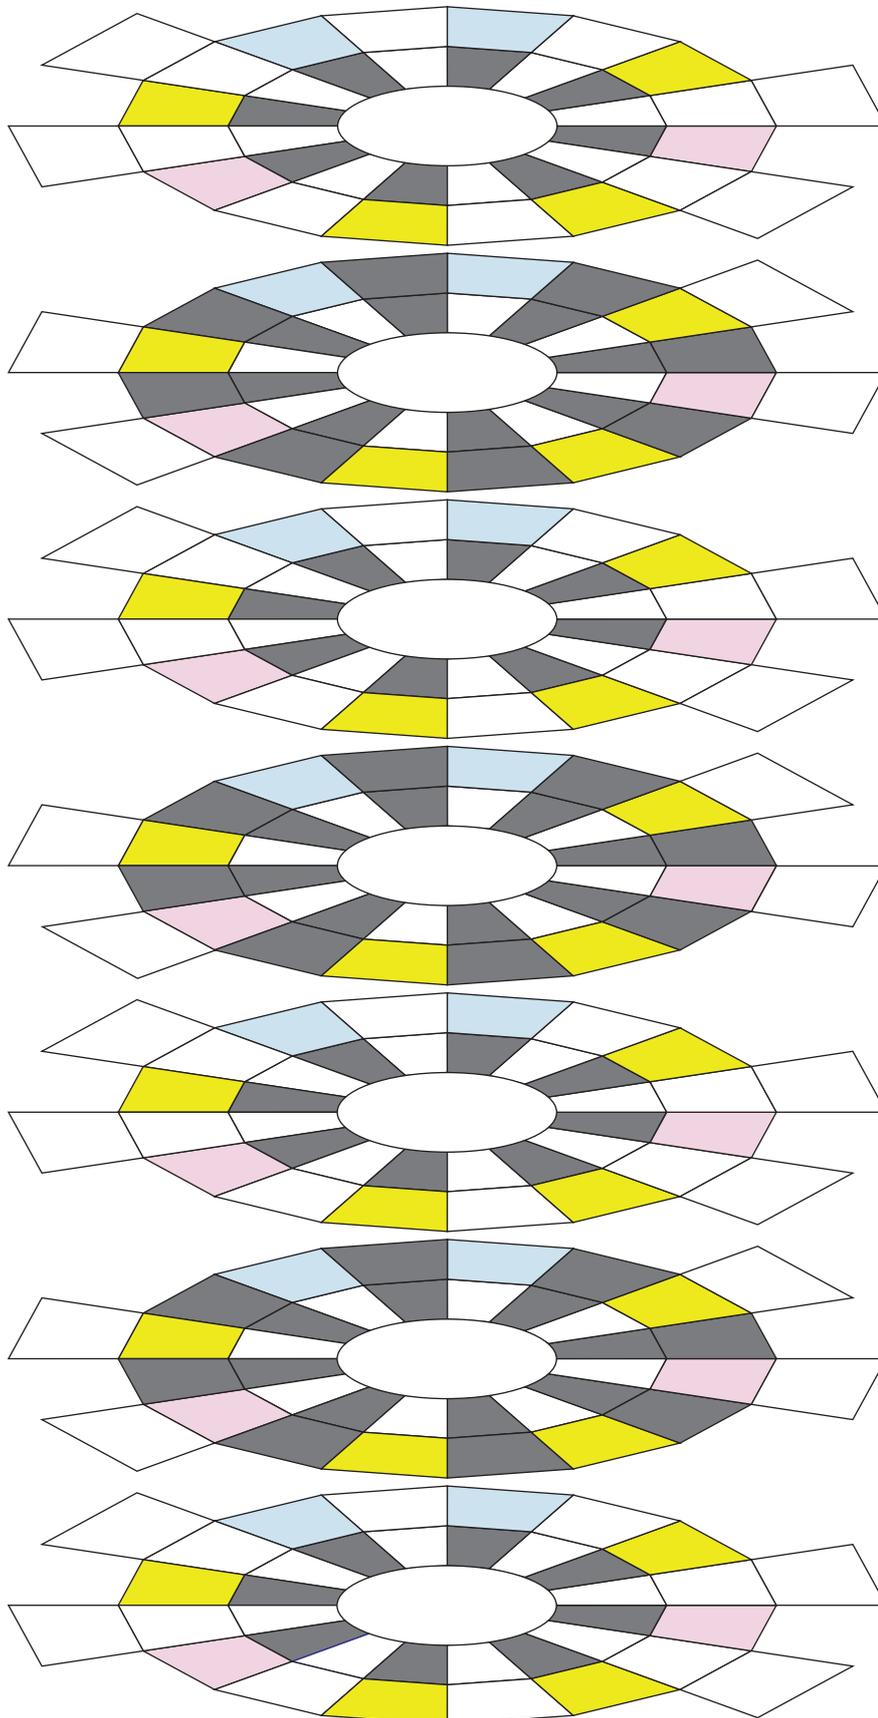

Some seven letter solutions are split into two unconnected words separated by a bar. Their clues are separated by a colon.

Circular solutions may also be split into two or more unconnected words separated by bars. This grid does not show bars. Bars are part of your solution.

The coloured highlights are there just to help the eye move around the grid.

Complete the grid, list the 4 solutions that do not fit and hence solve the mystery. They can be represented in a fanciful eighth dial, but you are advised to ignore this eighth dial.

Good luck!

Seven Dials Mystery (Separate Dials)

One of the eight revolving dials has appropriately an extra 7 black cells, plus one ampersand. This dial is not used in the main grid.

This whimsical 'eighth' dial shows the four solutions that do not fit the main grid and which solve the mystery. You are advised not to waste time constructing this fanciful dial.

RNIB 3D Crosswords Cup 2013

The Seven Dials Mystery

A Spinning Jigsaw in Three Dimensions

Clues are arranged in alphabetical order of their solutions. Complete the grid to find four solutions that do not fit and which answer the mystery.
