

September Extra 2017 Sirius Gin

This super and unusual grid from Gin requires a suspension of belief.

Imagine that the third layer down is a mezzanine floor. A lift on the left of 'the building' would call at six floors. A lift on the right calls at only four floors. The four cells containing a question mark at 13d are therefore continuous, and provide the last four letters of the snake at Day 5.

The mauve and yellow highlights become meaningful when the jigsaw is assembled correctly, as do blue cells and the four with darker edges.

Fit solutions jigsaw-wise where they will go. Directions are given for Day 5. Clues are presented in alphabetical order of their solutions.

An appointment 100 years ago led to a formal encounter that would only become of any interest, or indeed amusement, some years later.

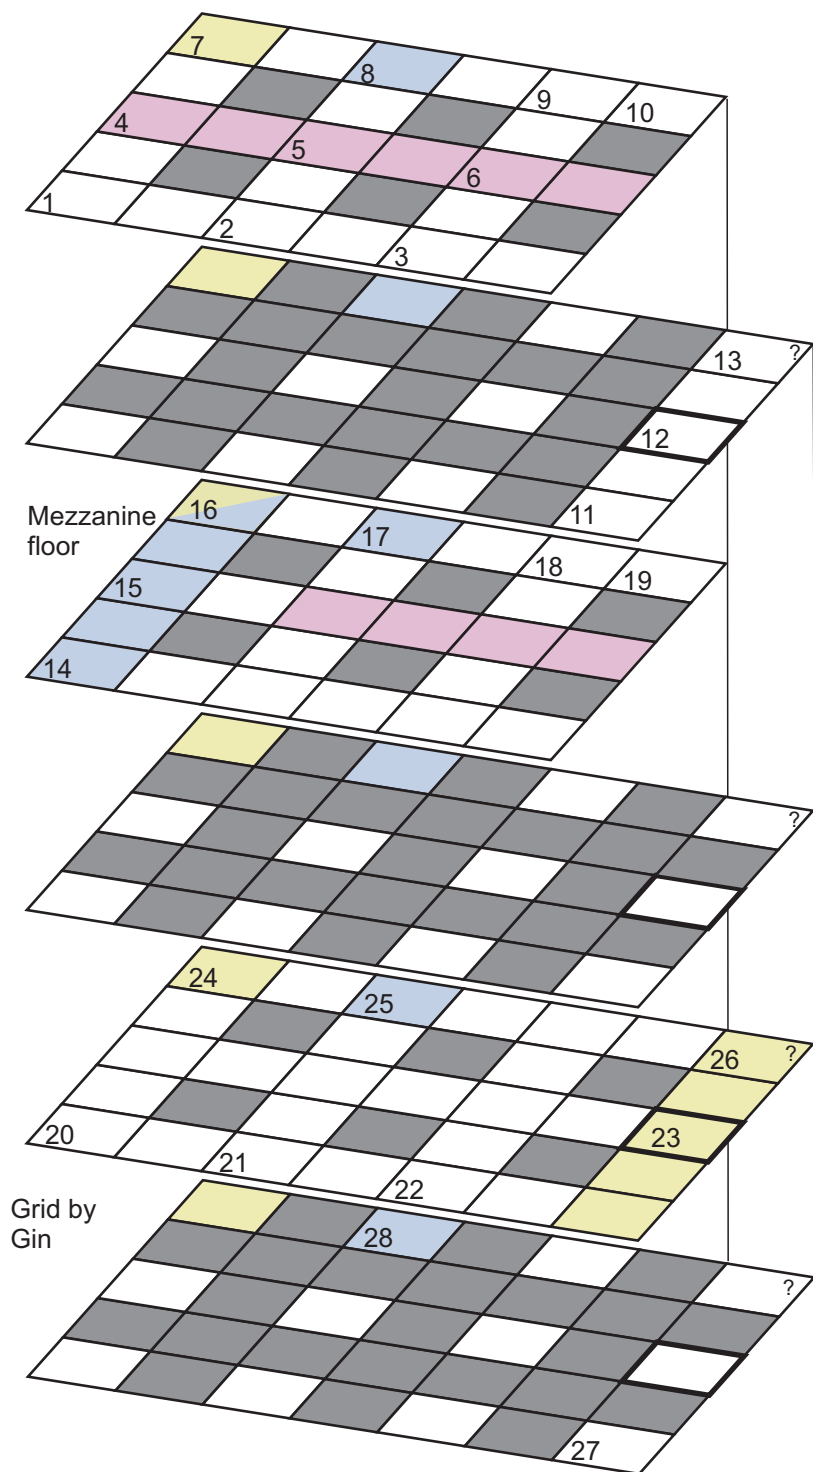

The answers to the following, when sorted and ordered, should provide further clues to the titles of two additional books relevant to the theme.

2ac-3 – 7to – 10ba – 14ac – 18to – 2ac-3 - 21aw – 25ba
