References below are to the solutions for that day.

The first name of a certain 28,1, born 100 years ago in 14, can be found by following the orange curve as it visits yellow highlighted cells. Draw a second similar curve to find the surname and the theme (23).

Three cells have each divided into two. One set of double letters contains relevant Roman numerals linked to 17. The other two sets of double letters contain three different thematic letters, identified whilst working for 20 alongside 31 and mentor to 7. Three light blue cells will confirm.

Clues are presented in alphabetical order of their solutions.
